BULLS AND BEARS OF WALL STREET

is the title of an 83-page volume treating of Wall street and stock speculation. Every speculator should have a copy. Full explanation theory of trading, handsomely illustrated. Mailed to any address for 10 cents in coin or stamps. JOHN B. McKENZIE, 11 Broadway, N. Y.

BUSY WEEK IN SHARES

OUTSIDE DEMAND ATTRACTED BY

Reaction Late in the Week Forced by Liquidation-Unseasonable Weath-

business in bankers' bills at \$4.83% for demand and \$4.80% for sixty days; posted rates, \$4.81@

'The week's exports of precious metals at New York were \$12,500 in gold and \$1,019,820 in silver

\$35,977 in silver.

valued at \$11,117,651.

The Financier says: "The statement of the associated banks of New York city for the week rule of calculation this increase cannot be accounted for, although the peculiar workings o days could not have figured fully in the state ment, and treasury disbursements in bank operathat the drain which the interior banks have made an New York this fall is nearly at an end. beat bankers believe that the return of this money will be slow, and will not figure appre-ciably in the statements until near the end of the year. Perhaps the first evidence of the turn of the tide will be seen in a contraction of outstanding national bank notes, the volume of which has been increased \$84,000,000 in a year. these notes are scattered all over the United States, and any redundancy in circulation will operate toward their partial retirement. The elasticity of national bank note currency under

There was a very manifest disposition to sell Nocks to take profits Saturday. The appearance herease the seiling, and the whole list gave way, thesing weak and at the lowest prices. "Net losses of between one and two points are recorded in not a few stocks, both in the industrial and railroad lists. The former department was of strength after the opening, notably Sugar. Brookiyn Transit and Metropolitan Street-railway, which were most actually affected by that late selling movement. The iron and steel stocks, as a group, were weak, in spite of encouraging reports of the industry in the weekly

mmercial reviews. Some of them suffered to the extent of 1 to 1% per cent. In the railroad list the most conspicuous selling was in Missouri Pacific, as the latest stock to be subjected to unwarranted rumors to adance it, followed by authoritative denials. Other members of the Southwestern group fared better, notably St. Louis Southwestern preferred. The Chicago & Altons and Kansas City Southerns were strong. South-Such a department is formed for the pur- ern Pacific continued heavy, in spite of the de cision upon the new president, the Readings were quite weak at losses of a point. There was a disposition about the exchange to depreciate the excessive tendency of the speculation and the broadness of the methods employed in some quar-The systematic and periodical disseminacan be used at their will and where they stability of a market where buying was based on such flimsy grounds.

No intelligible explanation is offered for the large increase in cash reported by the banks for the week. Preliminary estimates of the changes, based on statements furnished by the banks themseives, and made by recognized authorities, community. It teaches the young the value had placed the probable loss in cash all the way of money; it inspires them with the idea of from \$1,500,000 up to over \$5,000,000. The payment attaining habits of economy and frugality | Friday, by the subtreasury, of drafts for \$4,000, 000 on account of the Australian gold recently arrived in San Francisco was not expected to figure in this week's statement. The week has been one of great speculative activity in stocks, and has afforded opportunity

to market very large holdings. The development of an outside demand has been accompanied by manipulation of prices in the interest of speculators long of stocks. The successful efforts to get prices up have resulted in handsome profits in the selling to outside buyers. That many of the buyers had in view merely a speculative operation, hoping for a continued rise in prices which would offer a profit on a resale, was evident from the selling pressure which developed on the advance, and which turned prices backwards. But the bull interests on the exchange constantly shifted their operations to new quarters of the stock list, and kept the speculative interest awake by developing new price movements Nearly every day during the week brought forth publications alleging far-reaching changes in control and in plan for operation of great railroad properties or allied or connecting systems, with promises of colossal results in profits. Looking back over the week, it is noticeable that these stories have failed of confirmation, and in so that after the first unward jump of the stock, it has fallen back in price and become compara-

Pernsylvania street. Such changes and facts make it evident that prices have been forced up artificially, they do not necessarily de-tract from the values, as a barometer of general conditions, of the increased activity and higher prices of stocks. The important point is that an outside interest has been attracted in the stock market. Previous efforts have been made to attract such an interest by ostentatious advances in prices, but without avail, and the stock market has been confined to the trading between professional operators ever since last spring:

GOOD OUTSIDE DEMAND. this state of things, has made its appearance in the stock market. Professional operators have long expected this, and have gone long of stecks in consequence. The week's events represented gallon. Eggs advanced 2 cents a dozen, and stocks were large. During the week linseed oil moved up 5 cents a gallon. Eggs advanced 2 cents a dozen, and stocks were large. Steel cut nails, \$2.65; wire nails, from store, \$2.65 rates: from mill, \$2.65 rates. Horseshoes, in consequence. The week's events represented gallon. Eggs advanced 2 cents a dozen, and painted, \$3.10. 3 per cent. interest paid on de- their enorts to get the best prices possible for their holdings. It is an invariable incident of a cent, and coffees are very firm at quotations, their holdings. It is an invariable incident of a cent, and coffees are very firm at quotations, their holdings. It is an invariable incident of a cent, and coffees are very firm at quotations, their holdings. It is an invariable incident of a cent, and coffees are very firm at quotations, their holdings. It is an invariable incident of a cent, and coffees are very firm at quotations, their holdings. It is an invariable incident of a cent, and coffees are very firm at quotations, their holdings. It is an invariable incident of a cent, and coffees are very firm at quotations, their holdings. It is an invariable incident of a cent, and coffees are very firm at quotations, their holdings. bull market, also, that after the professional operators have worked through the list of stocks and exploited all those available for a rise, and sold their holdings, they will be as industrious in sowing discouraging opinions regarding future values as they were before in expressing confidence. Verisimilitude will always be given to these opinions by an ostentatious display of a headlong desire to sell stocks. The week has not lacked evidence that the professional mind of the stock operator has already arrived at this stage with regard to some stocks. There is always the doubt, which the public must struggle to solve, whether the anxiety of the professional is greater

to sell his own stocks, or to get the public to sell It is a fact that conservative financial circles have for some time past discountenanced attempts to advance prices of stocks and to stimulate a general speculation, owing to the doubt whether the demands on the money markets of the world through the fall and winter season wouldn't make it dangerous to inflate credits for merely speculative purposes, with the chance Safe Deposit Vault that a calling of loans would be necessary, which would precipitate a speculative liquidation and a dangerous fall of prices. The recent supplies o gold secured at various points in Europe and in London for import, and which now amount to nearly \$11,000,000, has been the determining influences in relieving apprehension over the money outlook. It had been feared that such a withdrawal of gold would have dangerous consequences in Europe, which is still cut off from its former source of supply in the Transvaal. That European markets have been undisturbed by this movement is partly due to the skill with which the exchange operations have been handled. American agents have scoured all out-of-the-way sources for floating supplies of gold, in order not to encroach on the supplies in the great central institutions abroad. This solicitude over foreign markets finds its cause in enlightened selfishness. as American financial interests in these markets are larger than ever before, and the country's export trade would be damaged by an upset in foreign money markets.

Meantime the conviction has gained force that prosperous business and industrial conditions are assured for the coming year. The large demand for money in circulation, the increasing activity in the iron trade, the continued high level of railroad earnings, the enormous profits in cotton exports, the growing foreign demand for grain, the settlement of the anthracite miners' strike, all were of influence in encouraging sentiment over the outlook. It is the belief in business circles that a large amount of business has been held back until the passing of the peril of unsettlement incident to the political campaign, so that the approach to election has been a factor in the speculative activity, the effort being to discount post-election conditions. The week's receipts of gold in New York, on the import movement, have kept the money rate down, though the demand for credits incident to the speculation has not been without effect. The facilities afforded by the money market have been the determining cause of letting loose the speculative tendency which has been under restraint for some time. An incident of the week has been the continued advance of silver to the highest level in four years, and the apparent ulmination of the rise and slight reaction Bonds, as well as stocks, have responded to an awakened public interest and some issues have gained substantially in prices. United States refunding twos advanced %c, and the threes, new and old fours and the fives, registered, 1/2c, 4.81 and \$4.84 @4.85; commercial bills, \$4.79 @ and fives, coupon, % per cent. over the quotations

Saturday's Bank Clearings.

Trade of the Week Not as Good as in

the Preceding One.

LOCAL GRAIN AND PRODUCE.

On the wholesale streets trade, the past week, ended Oct. 20. Unusually warm weather for October was one of the drawbacks, and as election draws near merchants are holding off in tail merchants have fair stocks now and prefer ance of future business prosperity that the in- to wait a few days before stocking up on a libquiry for securities, which inevitably results from | eral scale. On Commission row it was the dullthis state of things, has made its appearance in est week in the last three months. Fruits and their efforts to get the best prices possible for leather 1 cent a pound. Sugar rose a quarter of as are smoked meats. The hide market is firmer, but not quotably changed. Flour is weak at quotations. The seed market is active and prices are strong in tone. Cheese is firm. In other lines there are no new features.

The local grain market was the most active during the entire week, in many months, arrivals of new corn averaging seventy carloads a day the week prices fluctuated from 1/4 to 2 cents on corn and 3 cents on wheat. Oats were practically unchanged. The week closed with bids, as reported by the secretary of the Board of Trade, ruling as follows, both old and new corn being quoted the same on the track: Wheat-No. 2 red, 711/2c; No. 2 red, on milling

freight, 71½c; No. 3 red, 67½@69½c; wagon wheat, Corn-No. 1 white, 371/2c; No. 2 white, 371/2c; No. white, 37c; No. 4 white, 33@35c; No. 2 white mixed, 37c No. 3 white mixed, 37c; No. 4 white mixed, 36½c; No. 2 yellow, 37½c; No. 3 yellow, 37½c; No. 4 yellow, 36c; No. 2 mixed, 37c; No. 3 mixed, 37c; No. 4 mixed, 33c; ear corn, 34c. Oats-No. 2 white, 24½c; No. 3 white, 23½c; No. 2 mixed, 22½c; No. 3 mixed, 21½c. Baled Hay-No. 1 timothy, \$13; No. 2 timothy. Inspections-Wheat: No grade, 1 car; No. red, car; total, 2 cars. Corn: No. 2 white, 2 cars;

No. 3 white, 31 cars; No. 4 white, 8 cars; No. 3 white mixed, 5 cars; No. 3 yellow, 4 cars; No. 2 mixed, 1 car; No. 3 mixed, 27 cars; No. 4 mixed. 2 cars; ear, 1 car; total, 81 cars. Oats: No. 2 mixed, 1 car; rejected mixed, 1 car; total, 2 cars. Hay: Timothy hay, 2 cars.

DO YOU SAY YOUR PRAYERS? Probably Not, Though You Were Taught to Do So.

New York Evening Sun. How many men say their prayers? It would be interesting to know. All men, just as all women, were brought up to pray; at least the number not so brought up is so small as not to count. Boys, like girls, are from their earliest infancy taught to pray. An atheist himself would scarcely deny his children so gracious and personal a rite. In homes where, through indifference largely, all other letter and spirit of religion are lacking, you will find that the little children in the nursery regularly say their prayers—generally to a nurse and often in several different languages, but the prayers are said. Why should it be regarded as a privilege of childhood? At what age is the habit dropped? If there is any form or phase of religion that is beneficent just in its letter alone, it is the daily prayer. All evidence, from the case of little Arthur in "Tom Brown" down, goes to prove that men are less likely to keep up the habit of prayer in adult life than are women. One young woman, when asked if she still said her prayers. replied: "Regularly—when I am spending the night with another girl." But this, we are consight with another girl. But this, we are consistency of the state of the fact that missing the constant of the case of little slow, but all were finally sold. The bulk of the gard has grown perfectly white, but the eyes are still young, fresh and bright, and the expression of his face reflects his innate goodness of heart as well as his great vitality of spirit. Until last year's attack of rheumatism, Emperor Francis Joseph was never ill. When the doctors then recommended the Gastein cure he answered in all seriousness: "I will wait till I am old for that." Evidence of the fact that missing the constant of the case of the sales was made at \$4.50 to \$4.70, with select that the sales was made at \$4.50 to \$4.70, with select that the sales was made at \$4.50 to \$4.70, with select that the sales was made at \$4.50 to \$4.70, with select that the sales was made at \$4.50 to \$4.70, with select that the sales was made at \$4.50 to \$4.70, with select that the sales was made at \$4.50 to \$4.70, with select that the sales was made at \$4.50 to \$4.70, with select that the sales was made at \$4.50 to \$4.70, with select that the sales was garded as something set apart. They never talked about it, even to each other, much less to the little girl herself, but all felt it to be a mark of extra religious respectability upon her part that, by default of their own bringing up, they had been denied. None of them was enterprising enough to follow suit and say her prayers in the morning, too. Perhaps they thought that would be hypocritical, not having been taught that way originally. The joke of it was that the little girl they all looked up to in this particular was a regular limb a perfect in this particular was a regular limb—a perfect irrepressible at home, in school and abroad. No matter what she did, though, the others always felt that she was somehow excusable. Whatever enormity of conduct she was guilty of, it was to be remembered that she said her prayers night and morning.

Mysterious Fatal Accident.

MINNEAPOLIS, Oct. 27.—Robert Pinney was to-day accidentally crushed to a mass which bore some semblance to a human body, at the government dam, on the Mississippl between here and St. Paul. Drawn on a drum by a cable, his life was squeezed ont. It required half an hour to take the machinery apart and release the body.
As it was they found the body cut in segments. The accident had such an effect on the workers that the entire force, numbering 175 men. stopped work. Pinney was engineer on one of the fifty-ton cable standard. \$2.1062.40; California seconds, \$1.2062.

Pinney was beans 2-10, \$262.10; cove systers, 1-10, \$1.2561.30; pineapples, \$3.000 Lighter supplies checked the bering 175 men, stopped work. Pinney was being 175 m

CATTLE QUIET, WITH INDICATIONS OF INCREASING WEAKNESS.

Hogs Opened Steady, but Subsequently Declined-Sheep Quiet-Condltion of Markets Elsewhere.

receipts of cattle were small, the market was quiet on account of the limited demand from all buyers, and sales were usually at lower prices than yesterday. The receipts this week show an the same week a year ago, and the receipts so far this year show an increase of 1,500 over the corresponding period last year. The supplies most of the week were small, and notwithstanding the demand was rather indifferent and limited from all sources, salesmen succeeded in maintaining steady prices for all good stock. The conditions were not such as to encourage a more liberal marketing, but it seems that a good many cattle were ready to come, and at the close of the week the receipts were unusually liberal. There was no improvement whatever in the demand, and the orders were all filled long before the supply had been exhausted. Closing prices of the week were generally about 10c lower than the other kinds was so irregular that it would be difficult to make a true statement. The demand for the best feeding cattle was about as good as expected, and steady prices prevailed, but common stockers were plentiful and had no fixed value, salesmen having to accept whatever they could get. At the extreme close of the week several loads of good cattle as well as a large proportion of common to medium grades had not changed owners. During the week steers sold as

high as \$5.55, helfers \$4.90, cows \$4.40, calves \$6.50 and bulls \$4.25. Quotations: Good to prime steers, 1,350 lbs and up-Fair to medium steers, 1,350 lbs and Fair to medium cows...... 3.00@ 3.50 1.00@ 2.75 Good to choice butcher bulls...... 3.40@ 3.65 Common to fair bulls...... 2.50@ 3.25

Good to choice cows and calves......30.00@40.00

Common to medium cows and calves...15.00@25.00 HOGS-Receipts, 2,500; shipments, 500. About 1,000 more hogs arrived than a week ago and 2,000 less than a year ago. The arrivals included some very good kinds, in fact some better than any here yesterday. The market opened with a very fair demand and a few early sales were reported at about yesterday's prices, but generally buyers were asking concessions, and later, in keeping with lower markets elsewhere, salesmen had to take off about 214c in prices. Before all had changed hands there was probably 5c decline, and the last arrivals showed at least that much change compared with yesterday. A good clearance was made at current prices. The receipts this week are about 1,500 smaller than last week and 3,500 smaller than the same week a year ago. Thus far this year the receipts are over 245,000 smaller than the same period last year. Values have been very uneven this week, but reactions have been followed by almost an equal rally, and at the close of the week there was not a great deal of change in the average compared with the opening. On account of a greater difference between prices here and in Eastern markets there was some improvement in the shipping demand, but local packers are still taking a very large percentage of the supplies. The quality generally has been satisfactory, and more big heavy hogs were represented than last week. Quotations:

Good to choice medium and heavy \$4.70@4.85 Mixed and heavy packing..... 4.60@4.70 Good to choice light weights..... 4.65@4.721/5 Common to fair light weights..... 4.55@5.65 Common to good pigs..... 3.75@4.40 Roughs 4.00@4.30 Sheep-Receipts light; shipments none. There were not enough fresh arrivals of sheep and lambs to interest buyers and the market was necessarily quiet, but sales did not show any quotable change compared with yesterday. The receipts this week show a decrease of over 100 compared with last week and an increase of nearly 300 over the same week a year ago. Thus far this year the marketing is an even 8,000 head smaller than the same period last year. There have been no important changes in the market 1,500 this week, the supplies have been just about large enough to interest buyers to a small extent, and with generally satisfactory quality represented the trading at all times was reasonably

Art of Washing Clothes Well Not

Known to English Women. Elizabeth L. Banks, in Chicago Post. London has a new sensation in the shape of afteen or twenty orange-colored laundry wagous being driven about by Chinamen. The fact that these Chinamen, sitting up in conspicuous places on bright-hued wagon seats, are not shot at by the London mob, or even so much as yelled at or treated to the popular new slang expression, "There's 'air!" by the English small boy, goes to show how utterly discouraged London has become with its native washerwomen and how even the despised yellow man fresh from the land of the "Boxers" and with his pigtail all too prominent can be heartily welcomed when he comes with the cry of "Washee, washee,

London washerwomen are like a certain brand of soap in that they "won't wash clothes." They attempt to wash them-oh, yes! The hamper of remarkable-looking garments that comes back to me every week from my laundry ("a large, sanitary laundry where fifty women are em-ployed," so runs the prospectus in the front of my laundry book) bears testimony to those outrageous "attempts." But for really washing clothes, they simply won't do it. Perhaps it is because they don't know how, and, as for their Good to choice 1.150 to 1.300-lb steers... 4.65@ 5.15 because they don't know how, and, as for their Fair to medium 1.150 to 1.300-lb steers... 4.15@ 4.50 learning how, that is something they positively Medium to good 900 to 1.100-lb steers... 4.00@ 4.60 refuse to do. Now, my washerwoman is just Fair to medium feeding steers 3.50@ 4.10 like all the other washerwomen in Lendon. Common to good stockers 3.00@ 4.00 have tried a great many, because at first Good to choice heifers 3.60@ 4.50 thought I might have been particularly unfor-Fair to medium heifers...... 3.25@ 3.50 | tunate, but each successive one is the same as 2.75@ 3.15 her predecessor, only more so. goes at the business of clothes washing, and

then wonder, if you can, that, to the cry of 'Welcome! Welcome!" shouted by thousands of Englishmen and Englishwomen this week when they saw the pigtailed Chinamen mounted on their laundry wagons I added my mite. What if from the far East there does come to us random notes from the performances at the concert of the powers! 'that ofttimes discordant music is altogether so far away that we can stop our ears against it or drown the sound entirely by our own cries to the passing Chinese laundry wagon of "Washee! Washee! clean our clothes and smoothly iron them!" But to the London washerwoman and her evil ways! She gets a tub half full of water-water that is dirty and with a scum on top of it because she has neglected to wash the tub before she put it away last week. She puts into that tub a board. No! I did not say a "wash-board," for then you would think it the selfsame fluted thing of zinc or wood that you in Chicago use for laundry work. 'Tis just a board -an ordinary kind of board that she is quite likely to have knocked off a soap box. Across the top of the tub she puts the board, and into the tub of dirty water she puts the linen. Then with a piece of the most diabolical kind of soap that eats into her own poor, rough hands and even eats into our skin, too, when we put on that badly rinsed linen, the genius of the tole that badly rinsed linen, the genius of begins operating with a scrubbing by exactly the same kind of brush that one uses for the kitchen floor. Let us be thankful if ! turns out not to be the identical one! A garmen is spread out on the board; the washerwoman scrubs it heavily if 'tis a fine and dainty bit o lingerie and lightly if it's coarse and ordinary-that's a "way" she has with her! Presto! the article is "washed" and thrown into what is called a "copper," but is just "tin," rusted all along the edges because wasn't properly wiped out the last time. It boils till tender, and then it's taken out, and

ment all up in a wad, press it together with her two hands, and then hang it out on a line, if she happens to have a garden. In that case "blacks" from the London chimneys fall down upon it, just like snowflakes descending from the sky-that is, not at all like snowflakes! When dried-which process takes a very long time because the garment has been hung out dripping wet, it is "sprinkled" in one corner or in the middle, thrown on a table and "mangled" or ironed. No folding up tightly and put-ting away to wait for the sprinkling to take effect does the London washerwoman believe in. A half-cold or scorching hot dirty iron com-pletes the process of the "laundering" of our Perhaps you will think I speak only of the washerwoman who does washing and ironing in a "small way." No! I have described the process of washing and froning in every typical London laundry where "hand work" is done. As for the places where they do "machine work" with steam engines, they are worse, so

with curious little iron rust spots all over it, the article is soused through what is called clean

water, but is not, since the rinse tub was not

properly cared for the last time any more than

out." The washerwoman calls it "wringing, but her method of doing it is to take the gar-The washerwoman calls it "wringing

the wash tub or the boiler. It is then "wrung

far as results are concerned, than are the "hand" establishments. I speak not only from my own personal experience, but from the ex-perience of all my friends, both American and English, who have had washing done in London. Englishwomen who have visited France and the United States are loudest in their denunciations of the present English laundry system. Some of them tell me they would be willing to pay double the price charged if they could only get their linen done up as it is done in France and

THE AUSTRIAN EMPEROR. Simplicity Marks the Personal Habits of Francis Joseph. As a rule the Emperor of Austria dines alone at a small table in his studio, where he trans-

aid-de-camp, who usually dines in the next

Marrying Later in Life. Philadelphia Times.

There is a noteworthy coincidence between Prof. Franklin H. Giddings's conclusions about the effect of the factory employment of women on the age at which they marry and the statistics compiled by \$2.50@4.49; calves, \$4@4.60; Texas fed steers, \$4@ Miss Mary Roberts Smith, of the Leland 4.90; Texas grass steers, \$3.35@4.15; Texas bulls, Stanford University, as to the comparative marrying age of the college woman and the noncollege woman. The Columbia professor says that factory work makes the average age of women at marriage greater. Miss Smith so far agrees with him as to say that the marrying age for all women good to choice wethers, \$3.90@4.15; fair to choice has been growing greater for the last thirmixed, \$3.45@4; Western sheep, \$3.90@4.15; Texas ty years. But she adds that the college sheep, \$2.50@3.00; native lambs, \$4.25@5.50; West- woman waits till she is twenty-six, while the noncollege woman marries at the average age of twenty-fou It seems, then, that both factory employment and higher education tend to postpone the age of marriage for women, as compared with the old-fashioned domestic and social career for young women. This postponement is almost universal regarded as beneficial, because matur has better fitted the bride for the intel-lectual and moral responsibilities of motherhood. The advent of women in fac-

tories, where they handle delicate machin
